

Ronnie's Prostate Cancer Ordeal

How he, five months later, is cancer free.

Sept. 2012 I sat waiting for Ronnie to come out of the doctor's private examining room where he was to get a prostate cancer biopsy. When he came out he was in a lot of pain. "I couldn't go through with it, I'll have to go to the hospital", he said. "The tests show I definitely do have prostate cancer. The Gleason test showed from one to ten, I am a seven, which means the cancer is ready to get aggressive." After the biopsy, done in the hospital, it agreed with the doctor's verdict; there was no doubt, Ronnie had a very serious cancer problem. This is his story; I won't go into how that made me feel. We had already suffered through the loss of son, Cliff, both our Mother's, and a daughter, Sheila, who had died from breast cancer, all within the span of four years. During which time I spent fourteen days in the hospital with massive blood clots on both lungs, and later a frozen shoulder which led to surgery. During the same period our Indiana home was broken into. We fought depression. Now there was to be a new problem, Ronnie had to make a decision. Since Ronnie insisted on no chemo, the doctor gave us three choices: surgery, radiation, or a six month hormone therapy shot. We settled for the shot which was supposed to keep the cancer from spreading for six months. It could only be taken two more times, at which time the body would become immune to it. Without any other treatment he may have at least five years of life after that. We grieved for a couple weeks and then started planning to go back to Florida for the winter. First we attended our yearly religious festival, "The Feast of Tabernacles" and requested the prayers of the many brethren there. Prayers were also offered up to God in our own Home Bible study group. When we got to Florida our friends there begin praying for us, too. Needless to say we did a lot of praying.

Ronnie continued struggling with vomiting, frequent painful urination, and discomfort. Added to his other problems he started having hot flashes, from the shot, that was a constant irritation. In the meantime we started searching the internet for alternate solutions. Nothing seemed reliable until daughter, Tammy, introduced the web site of Jim Humble to us. We had studied several others but this one really got our attention. We felt like God was answering so many of our prayers. We sent for the book and the minerals Jim introduced. Ronnie mixed the inexpensive liquid combinations himself, and drank it as instructed every day. Gradually he begin to feel better. The symptoms left. We all rejoiced. Before we left Florida for Indiana he went for a last check up there in Feb. 2013. The doctor seemed surprised that his prostate had shrunk and made the comment that it was really small and questioned as to whether Ronnie had ever had prostate cancer. But the records were there! When Ronnie told him he had been taking a mineral called Miracle Mineral Solution that enhanced the immune system, the doctor commented, "Oh that will never work". Can you believe that? When the results of his blood test came back his P.S.A. test had dropped from 7.6 to 1.2, and is still there. He had one more test by the same office that had given him the six month shot. The doctor was so impressed with the result of the P.S.A. test that he asked to see the book, and made the comment, "I'll have to look into that!" He scheduled Ronnie for another appointment in three months, and didn't even examine him. I think he just wants to see for himself if it's really going to last. But we know Ronnie is cancer free!

Some may want more information on this mineral, if so, you need to go to the website "WWW.JimHumble - MMS. I get a news letter from them every month on my e-mail. He is doing amazing things in Africa where he is freed to work. This mixture of minerals strengthens the immune system so strongly that it will kill many germ related diseases, not just cancer. There is a long list of diseases that it will get rid of if done right. The only thing I can think of that it won't heal is something like broken bones, damaged nerves, dementia, weakness, etc. If you or someone you know that is debilitated with a serious disease spread the word, you may save a life.

Look for the newsletter from Jim as God's answer to Ronnie's Cancer. It will give you and idea what this man is doing for people.
