

UPDATE ON RONNIE'S LATEST VISIT TO DOCTOR (8/1/2013)

Ronnie's last checkup to the doctor who had given him the biopsy for prostate cancer in Oct. of 2012 which showed he did have prostate cancer, and that his Gleason test showed he was seven in the growing stage of from 1 to 10. The only way to find out what the numbers are for this test would be another biopsy. Even the doctor said that could be very damaging and unnecessary. After discovering the web site of Jim Humble and taking the mineral MMS (Master Mineral Substance) within two months Ronnie was totally healed of any previous symptoms of cancer. He has visited two cancer treating doctors, twice in Florida and twice in Indiana; neither can find any trace of prostate cancer. Ronnie's first P.S.A. test was ten point six, now it is down to one point eight. However, he has not gone through this without suffering, at the hands of his practicing physicians; I'll explain. The biopsy was so painful he had to be hospitalized. His first experience with the doctor's diagnosis was not unexpected since he had experienced symptoms of the problem for a couple years previously. He was given options of kemo, radiation, an operation, etc, or a six month hormone shot to stop the aggressive growth for six months, then come in for another shot, not to exceed three shots. He was advised that he would have to decide on one of the other methods at that time. The doctor explained, "This will only keep the cancer from growing, not heal it". In any case Ronnie had approximately five years to live. Then when asked what to expect from the shot we were told it would cause "some" hot flashes and a decrease in libido. What he didn't say was the hot flashes would hit about every hour (sometimes more often) and last for a period of over six months, and that libido would not even exist. While the results of the shot is very slowly decreasing, they still exist. When he visited the doctor (8-1-13) with the blood test results right before the doctor, showing Ronnie was cancer free, we couldn't believe it when he asked, "well, I guess you'll want another shot?" Ronnie got a little impatient with him and replied, "No way! Absolutely not! I don't "ever" want another one of those!" and continued to explain why. The last visit Ronnie made to the doctor in Florida in January 2013 told Ronnie that MMS would never work, when it had already worked. We asked if there was something that would help with the severity of the hot flashes, the doctor nodded and wrote us out a prescription with refill of up to eleven times before 2014. Taking these pills helped some but eventually caused chilling. When we tried to get the first refill the insurance we have refused paying for it, saying it was too dangerous for the purpose. Not one to give up, the doctor, in Indiana, said he wants to see Ronnie again in Sept. and dismissed us. I doubt we'll keep that appointment. If we do I'll post it, too. We give God the glory and praise Him for using Jim Humble to introduce this wonderful mineral to heal so many suffering people. Thanks to all you loving people who supported us with your prayers.
